Safety Precautions

IMPORTANT INFORMATION

WARNING:

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

WARNING:

THIS APPARATUS MUST BE EARTHED.

CAUTION:

To reduce the risk of electric shock, do not remove cover. Refer servicing to qualified service personnel.

This projector is equipped with a 3-blade grounding type plug to satisfy FCC rule. If you are unable to insert the plug into the outlet, contact your electrician.

NOISE EMISSION DECLARATION

The sound pressure level at the operator position is equal or less than 60dB(A) according to ISO7779.

WARNING

REMOVE THE LENS COVER BEFORE TURNING ON THE PROJECTOR

WARNING

This equipment is compliant with Class A of CISPR 32.

In residential environment this equipment may cause radio interference.

Supplier's Declaration of Conformity

Model Number: DLA-VS45NV, DLA-VS47NV,
DLA-VS45NVHB

Trade Name: JVC

Responsible party: JVCKENWOOD USA

Address: Corporation

1440 Corporate Drive, Irving,
TX 75038

Telephone Number: 678-449-8879

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not approved by JVC could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

IMPORTANT SAFEGUARDS

Electrical energy can perform many useful functions. This unit has been engineered and manufactured to assure your personal safety. But **IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARD.** In order not to defeat the safeguards incorporated into this product, observe the following basic rules for its installation, use and service. Please read these Important Safeguards carefully before use.

- All the safety and operating instructions should be read before the product is operated.
 - The safety and operating instructions should be retained for future reference.
 - All warnings on the product and in the operating instructions should be adhered to.
 - All operating instructions should be followed.
 - Place the projector near a wall outlet where the plug can be easily unplugged.
 - Unplug this product from the wall outlet before cleaning.
 - Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
 - Do not use attachments not recommended by the product manufacturer as they may be hazardous.
 - Do not use this product near water. Do not use immediately after moving from a low temperature to high temperature, as this causes condensation, which may result in fire, electric shock, or other hazards.
 - Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. The product should be mounted according to the manufacturer's instructions, and should use a mount recommended by the manufacturer.
 - When the product is used on a cart, care should be taken to avoid quick stops, excessive force, and uneven surfaces which may cause the product and cart to overturn, damaging equipment or causing possible injury to the operator.
- PORTABLE CART WARNING
(symbol provided by RETAC)

S3126A

- Slots and openings in the cabinet are provided for ventilation. These ensure reliable operation of the product and protect it from overheating. These openings must not be blocked or covered. (The openings should never be blocked by placing the product on bed, sofa, rug, or similar surface. It should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided and the manufacturer's instructions have been adhered to.)
 - To allow better heat dissipation, keep a clearance between this unit and its surrounding as shown below. When this unit is enclosed in a space of dimensions as shown below, use an air-conditioner so that the internal and external temperatures are the same. Overheating can cause damage.

- Power source indicated on the label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company.
- This product is equipped with a three-wire plug. This plug will fit only into a grounded power outlet. If you are unable to insert the plug into the outlet, contact your electrician to install the proper outlet. Do not defeat the safety purpose of the grounded plug.
- Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at doors, plugs, receptacles, and the point where they exit from the product.
- For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power line surges.
- Do not overload wall outlets, extension cords, or convenience receptacles on other equipment as this can result in a risk of fire or electric shock.
- Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
- Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltages and other hazards. Refer all service to qualified service personnel.
- Unplug this product from the wall outlet and refer service to qualified service personnel under the following conditions:
 - a) When the power supply cord or plug is damaged.
 - b) If liquid has been spilled, or objects have fallen on the product.
 - c) If the product has been exposed to rain or water.
 - d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the Operation Manual, as an improper adjustment of controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
 - e) If the product has been dropped or damaged in any way.
 - f) When the product exhibits a distinct change in performance, this indicates a need for service.

- When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or with same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
- Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.
- The product should be placed more than one foot away from heat sources such as radiators, heat registers, stoves, and other products (including amplifiers) that produce heat.
- When connecting other products such as VCR's, and DVD players, you should turn off the power of this product for protection against electric shock.
- Do not place combustibles behind the cooling fan. For example, cloth, paper, matches, aerosol cans or gas lighters that present special hazards when over heated.
- Do not ceiling-mount the projector to a place which tends to vibrate; otherwise, the attaching fixture of the projector could be broken by the vibration, possibly causing it to fall or overturn, which could lead to personal injury.
- Use only the accessory cord designed for this product to prevent shock.
- For health reasons, please take a break of about 5-15 minutes every 30-60 minutes and let your eyes rest. Please refrain from watching any 3D-images when you feel tired, unwell or if you feel any other discomfort. Moreover, in case you see a double image, please adjust the equipment and software for proper display. Please stop using the unit if the double image is still visible after adjustment.
- Once every three years, please perform an internal test. This unit is provided with replacement parts needed to maintain its function (such as cooling fans). Estimated replacement time of parts can vary greatly depending on frequency of use and the respective environment. For replacement, please consult your dealer, or the nearest authorized JVC service center.
- When fixing the unit to the ceiling, Please note that we do not take any responsibility, even during the warranty period, if the product is damaged due to use of metal fixtures used for fixation to the ceiling other than our own or if the installation environment of said metal fixtures is not appropriate. If the unit is suspended from the ceiling during use, please be careful in regard to the ambient temperature of the unit. If you use a central heating, the temperature close to the ceiling will be higher than normally expected.
- Video images can burn into the electronic component parts. Please do not display screens with still images of high brightness or high contrast, such as found in video games and computer programs. Over a long period of time it might stick to the picture element. There is no problem with the playback of moving images, e.g. normal video footage.
- Not using the unit for a long time can lead to malfunction. Please power it on and let it run occasionally. Please avoid using the unit in a room where cigarettes are smoked. It is impossible to clean optical component parts if they are contaminated by nicotine or tar. This might lead to performance degradation.
- Please watch from a distance three times the height of the projected image size. Persons with photosensitivity, any kind of heart disease, or weak health should not use 3D glasses.
- Watching 3D-images might be cause of illness. If you feel any change in your physical condition, please stop watching immediately and consult a physician if necessary.
- When watching 3D images, it is recommended to take regular breaks. As the length and frequency of the required breaks differ for every person, please judge according to your own condition.
- If your child watches while wearing 3D glasses, it should be accompanied by its parents or an adult guardian. The adult guardian should be careful to avoid situations where the child's eyes might become tired, as responses to tiredness and discomfort, etc., are hard to detect, and it is possible for the physical condition to deteriorate very quickly. As the visual sense is not yet fully developed in children under the age of 6, please consult a physician in regard to any problem concerning 3D-images if necessary.
- Note that when using the 3D feature, the video output may appear different from the original video image due to image conversion on the device.

*** DO NOT allow any unqualified person to install the unit.**

Be sure to ask your dealer to install the unit (e.g. attaching it to the ceiling) since special technical knowledge and skills are required for installation. If installation is performed by an unqualified person, it may cause personal injury or electrical shock.

- Do not use optical instruments (such as magnifying glass or reflector) viewing the laser output. It may pose an eye hazard.
- When turning on the projector, ensure that no one is looking into the projection lens.
- Do not look into the lens and openings when the light is on. Doing so would have serious effects on the human body.
- Do not detach or attach the projection lens with the power connected.
- Attempting to disassemble, repair or modify the projector yourself may lead to serious safety issues.
- Using a faulty product not only results in electrical shock or fire hazard, it can cause visual impairment.
- When abnormality occur, stop using the projector immediately and send it to your authorized dealer for repair.

Removing the batteries

CAUTION

- Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the local recycling standards.

POWER CONNECTION

For USA and Canada only
Use only the following power cord.

Power cord

The power supply voltage rating of this product is AC100V – AC240V (DLA-VS45NV / DLA-VS47NV), AC120V – AC240V (DLA-VS45NVHB). Use only the power cord designated by our dealer to ensure Safety and EMC.

Ensure that the power cable used for the projector is the correct type for the AC outlet in your country. Consult your product dealer.

Power cord

For European continent countries

WARNING:

Do not cut off the main plug from this equipment.

If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or adapter or consult your dealer. If nonetheless the mains plug is cut off, dispose of the plug immediately, to avoid a possible shock hazard by inadvertent connection to the main supply.

WARNING:

THIS APPARATUS MUST BE EARTHED.

Dear Customer,

This apparatus is in conformance with the valid European directives and standards regarding electromagnetic compatibility and electrical safety.

European representative of
JVCKENWOOD Corporation is:
JVCKENWOOD Deutschland GmbH
Konrad-Adenauer-Allee 1-11,
61118 Bad Vilbel,
GERMANY

IMPORTANT (Europe only):

The wires in the mains lead on this product are colored in accordance with the following cord:

Green-and-yellow	: Earth
Blue	: Neutral
Brown	: Live

As these colors may not correspond with the colored making identifying the terminals in your plug, proceed as follows:

The wire which is colored green-and-yellow must be connected to the terminal which is marked M with the letter E or the safety earth or colored green or green-and-yellow. The wire which is colored blue must be connected to the terminal which is marked with the letter N or colored black.

The wire which is colored brown must be connected to the terminal which is marked with the letter L or colored red.

Information for Users on Disposal of Old Equipment and Batteries

Products

Battery

[European Union only]

These symbols indicate that equipment with these symbols should not be disposed of as general household waste. If you want to dispose of the product or battery, please consider the collection systems or facilities for appropriate recycling.

Notice: The sign Pb below the symbol for batteries indicates that this battery contains lead.

Informations relatives à l'élimination des appareils et des piles usagés, à l'intention des utilisateurs

Produits

Pile

[Union européenne seulement]

Si ces symboles figurent sur les produits, cela signifie qu'ils ne doivent pas être jetés comme déchets ménagers. Si vous voulez jeter ce produit ou cette pile, veuillez considérer le système de collecte des déchets ou les centres de recyclage appropriés.

Notification: La symbole Pb en dessous du symbole des piles indique que cette pile contient du plomb.

[Nur Europäische Union]

Diese Symbole zeigen an, dass derartig gekennzeichnete Geräte nicht als normaler Haushaltsabfall entsorgt werden dürfen. Wenden Sie sich zur Entsorgung des Produkts oder der Batterie an die hierfür vorgesehenen Sammelstellen oder Einrichtungen, damit eine fachgerechte Wiederverwertung möglich ist.

Hinweis: Das Zeichen Pb unterhalb des Batteriesymbols gibt an, dass diese Batterie Blei enthält.

Informazioni per gli utenti sullo smaltimento delle apparecchiature e batterie obsolete

Prodotti

Batteria

[Solo per l'Unione Europea]

Questi simboli indicano che le apparecchiature a cui sono relativi non devono essere smaltite tra i rifiuti domestici generici. Se si desidera smaltire questo prodotto o questa batteria, prendere in considerazione i sistemi o le strutture di raccolta appropriati per il riciclaggio corretto.

Nota: Il simbolo Pb sotto il simbolo delle batterie indica che questa batteria contiene piombo.

Informatie voor gebruikers over het verwijderen van oude apparatuur en batterijen

Producten

Batterij

[Alleen Europese Unie]

Deze symbolen geven aan dat apparatuur met dit symbool niet mag worden weggegooid als algemeen huishoudelijk afval. Als u het product of de batterij wilt weggoien, kunt u inzamelsystemen of faciliteiten voor een geschikte recycling gebruiken.

Opmerking: Het teken Pb onder het batterijsymbool geeft aan dat deze batterij lood bevat.

For the customers In the U.S.A. and Canada

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

This Projector is classified as a CLASS 3R LASER PRODUCT.

This CLASS 3R LASER PRODUCT label and Caution label is located on the Rear Side surface of the projector.

Location information of the labels

APERTURE LABEL

LASER APERTURE

The APERTURE LABEL is located on the top cover.

WARNING

LASER RADIATION AVOID DIRECT EYE EXPOSURE CLASS 3R LASER PRODUCT.

CAUTION

Do not look into the lens while in use.

Light source specifications

30 W Laser diodes x6

Wavelength 450 - 460 nm

Maximum output is 64.12 W

Beam divergence angle from lens of this unit

Wide : $\alpha=71^\circ$

Tele : $\alpha=39^\circ$

Symbols used in this manual

VS47NV indicates a function that is supported by DLA-VS47NV.

VS45NV indicates a function that is supported by DLA-VS45NV.

VS45NVHB indicates a function that is supported by DLA-VS45NVHB.

Items not marked with any of the above symbols are supported by all models.

Accessories/Optional Accessories

Check the Accessories

Remote control 1 piece

AAA-size batteries (for operational check) 2 pieces

Power cord (for USA) (about. 2 m) **VS45NV VS47NV** 1 piece

Power cord (for USA) (about. 3.3 m) **VS45NVHB** 1 piece

Power cord (for EU) (about. 2 m) **VS45NV VS47NV** 1 piece

Lens spacer 1 piece

Screw 4 pieces

Sponge 1 piece

Front base 1 piece

- Other items include the instruction manual, warranty, and other printed materials.
- Be sure to read the “Safety Precautions” before using this projector.

Controls and Features

Main Unit - Front

① Lens (sold separately)

Zoom lens or short focal length lens is optional.

② Remote Sensor (front)

Please aim the remote control at this area when using it.

* There is also a remote sensor at the rear.

③ Indicator

Refer to "Indicator Display on the Main Unit" P. 77.

④ Exhaust vent

Warm air is discharged to cool down the internal temperature.

Do not block the vents.

Main Unit - Bottom

⑤ Feet

The height and angle of the projector can be adjusted by turning the foot. (0 to 5 mm) (P. 25)

When the foot is removed, it can be used as the mounting hole for the ceiling mount bracket.

Main Unit - Rear

⑥ Input terminals

For details on the terminals, refer to “Main Unit - Input Terminals” P. 18.

“Operation panel” in the diagram below.

⑨ Power input terminal

Connect the supplied power cord to this terminal.

Do not block the inlet. Do not blow hot air on the inlet. Doing so may cause the unit to malfunction.

⑦ Operation panel

For more details, please refer to the

* There is also a remote sensor at the front.

⑧ Remote Sensor (rear)

Please aim the remote control at this area when using it.

⑩ Air Inlets

The inlets take in air to cool down the internal temperature.

Operation panel

Main Unit - Input Terminals

① [SYNC OUT] terminal

For synchronizing with other equipment.

② [SERVICE] terminal

For updating the software using a commercially available USB flash drive.

③ [RS-232C] terminal (D-sub 9-pin male)

The projector can be controlled by connecting a PC to this terminal.

④ [LAN] terminal (RJ-45)

The projector can be controlled by connecting it to a PC through the computer network for control commands to be sent to the projector.

⑤ [DisplayPort 1] input terminal

⑥ [DisplayPort 2] input terminal

⑦ [DisplayPort 3] input terminal

⑧ [DisplayPort 4] input terminal (20-pin male)

For connecting to devices that support DisplayPort output. (P. 26)

⑨ [REMOTE CONTROL] terminal (stereo mini jack)

Outputs L and R sync signals during 3D signal input. (P. 52)

This terminal is used to connect the remote control directly to the projector with the cable.

Remote Control

① [STANDBY]

Turns off the power. (P. 29)

② [ON]

Turns on the power. (P. 28)

③ [DISPLAYPORT]

Switches the input to [DisplayPort 1] to [DisplayPort 4], [Dual] or [Quad]. (P. 28)

④ [LENS CONTROL]

For adjusting focus, zoom, and shift. (P. 41)

⑤ [C.M.D.]

For setting frame processing. (P. 39)

- Pressing the button each time switches the mode in the following sequence: "Off" → "Mode 1" → "Mode 2" → "Mode 3"...

⑥ [MOTION ENHANCE]

Switches the Motion Enhance setting. (P. 39)

⑦ [HIDE]

Hides the image temporarily. (P. 28)

⑧ [LIGHT]

Illuminates the buttons on the remote control.

⑨ [▲▼◀▶] keys

For selecting an item.

⑩ [OK]

Confirms a selected item.

⑪ [MENU]

Displays the menu, or hides the menu if it is displayed.

⑫ [BACK]

Returns to the previous menu.

⑬ [PICTURE MODE]

Switches the picture mode. (P. 32)

- Press [NATURAL], [DYNAMIC] or [USER1] to [USER6] to switch to the respective picture mode.
- Pressing [NAME EDIT] enables the name of the picture mode from [USER1] to [USER6] to be edited.

⑭ [GAMMA]

Switches the gamma. (P. 35)

- Pressing the button each time switches the configurable gamma in sequence.

⑮ [COLOR TEMP.]

Switches the color temperature. (P. 34)

- Pressing the button each time switches the configurable color temperature in sequence.

⑯ [LENS AP.]

For setting the aperture. (P. 32)

⑰ [PIC. ADJ.]

Displays the picture quality adjustment gauge. (P. 39)

- Pressing the button each time displays the adjustment gauge in the following sequence: "Contrast" → "Brightness" → "Color" → "Tint" → "Sharpness" → "LD Current" → "IR Current" → "LD Gain" → "IR Gain" → "Aperture" → "Picture Tone" → "Dark Level" → "Bright Level".

Loading Batteries into the Remote Control

Loading the batteries

Removing the batteries

- If the remote control has to be brought closer to the unit to operate, it means that the batteries are wearing out. Replace the batteries with new ones (AAA).
- Insert the batteries according to the \oplus \ominus marks. Be sure to insert the \ominus end first. When removing the battery, do so from the \oplus end.
- If an error occurs while using the remote control, remove the batteries and wait for five minutes. Load the batteries again and operate the remote control.

Effective Range of Remote Control Unit

When aiming the remote control toward the sensor on this unit (front or rear), ensure that the distance to the sensor is within 7 m.

If the remote control fails to work properly, move closer to this unit.

Control through reflection off a screen, etc.

Ensure that the total of distance A (between this unit and the screen) and distance B (between the remote control and the screen) is within 7 m.

* As the efficiency of signals reflected from the remote control unit varies with the type of screen used, the operable distance may decrease.

CAUTION

- Do not put the remote control in a place with an exposure to direct sun light or high temperature. It may be deformed due to heat, or the internal components may be adversely affected resulting in fire hazard.
- Remove the batteries from the remote control when storing the remote control. Storing the remote control for a prolonged period without removing the batteries can cause battery leakage.

Menu

Select the icon at the top of the menu to display its corresponding setting item as shown below.

⑥ Information

Installing the Projector

Precautions during Installation

Please read the following carefully before installing this unit.

When carrying this unit

This unit is heavy in weight. Please ensure that there are at least two persons carrying it.

Do not install at the following

This unit is a precision device. Please refrain from installing or using it at the following locations. Otherwise, it may cause fire or malfunction.

- Dusty, wet and humid places
- Places subject to oily smoke or cigarette smoke
- On top of a carpet or bedding, or other soft surfaces
- Places exposed to direct sunlight
- Places with a high or low temperature
- Do not install this unit in a room that is oily or subject to cigarette smoke. Even a small quantity of smoke or oiliness can have a long-term impact on this unit.
- * This unit produces a great amount of heat, and is designed to take in cool air to cool its optical components. Using the unit at the above locations may cause dirt to attach to the light path, thereby resulting in dark images or dull colors.
- * Dirt that sticks to the optical components cannot be removed.

Using the projector

There is no particular limitation on the positioning of the projector during installation. You can install at your preferred angle.

Maintain clearance from the wall, etc.

As the unit discharges a large amount of heat, install it with adequate clearance from the surroundings as shown below.

Leave the front area of the unit unblocked. If there is any obstructing object in front of the exhaust vent, hot air will flow back to the unit and cause it to heat up. Hot air flowing out of the unit may cast shadows on the screen (heat haze phenomenon).

Installing the screen

Install the unit and the screen such that they are perpendicular to each other.

- Please choose a screen material with non-uniform patterns. Uniform patterns such as checks may cause interference patterns to occur.
- In this case, you can change the size of the screen to make the interference patterns less noticeable.

Using the projector at a high altitude

When using this unit at a location that is higher than 900 m above sea level (low air pressure), set the "High Altitude Mode" to "On". (P. 49)

Precautions during Mounting

Securing (mounting) the projector

- When this unit is to be mounted to a fixed position for use, install it horizontally.
- Make sure to secure the main unit to prevent accidents such as during an earthquake.

Securing the projector (directly mount)

For directly mounting projectors to a stand for motion or non-motion systems, remove the four feet from the base of the projector and use the inner six mounting screw holes (see pictures below).

CAUTION

Use ONLY the fixing screws specified for mounting the projector. Using any screws other than those specified can cause damage and malfunction to the projector. NEVER insert the four outer feet into the inner screw holes, as the length of the screws are too long and will cause damage to the unit. If the mounting instructions are not followed, issues or failure can occur.

Non-Motion Applications

Outer 4 screw holes can be used

Screw Specifications

- M5 (screw pitch 0.8)
- The screw length into the body of the projector must not exceed 15 to 25mm.
- The length of the screw will be determined by the depth of the projector mounting plate.
Example - If the plate is 5mm thick a screw between 20 to 30mm must be used.
- Use screws with spring washers.
- Tightening torque
When this unit is suspended from a ceiling: 1.5 to 2.0N·m
Other than the above: 1.5 to 5.0N·m
- Do not use 2 adjacent locations (A+B, B+C, C+D) only.

Motion Applications

Inner 6 Screw holes must be used

Screw Specifications

- M5 (screw pitch 0.8)
- The screw length into the body of the projector must not exceed 17 to 25mm.
- The length of the screw will be determined by the depth of the projector mounting plate.
Example - If the plate is 5mm thick a screw between 22 to 30mm must be used.
- Use screws with spring washers.
- Tightening torque: 1.5 to 5.0N·m

Securing the projector (ceiling mount)

- Be sure to ask your dealer to install the unit for you. Installing the unit on your own may cause the unit to fall resulting in injury.
- Take the necessary actions to prevent the main unit from falling off such as during an earthquake.
- Regardless of the warranty period, JVC is not liable for any product damage caused by mounting the unit with non-JVC ceiling fittings or to an environment that is not suited for ceiling mount.
- When using the unit with it suspended from a ceiling, pay attention to the surrounding temperature. When a heater is in use, the temperature around the ceiling may be higher than expected.
- To attach the unit to the ceiling mount bracket, set the torque between the range of 1.5N m to 2.0N m. Tightening with torque exceeding the above range may cause damage to the unit, which may result the unit to fall.
- When reusing the ceiling mount bracket of an old model, consult the specialist to check if there are any issues with the surrounding space and increase in weight.
- Install the outlet at an accessible height to unplug from the wall. Or install the circuit breaker at an accessible height to shut down the projector. If you need information, please consult your authorized dealer or specialist.

Installing the ceiling mounting bracket

① Remove the rear foot (x2).

- It is not necessary to remove the front feet. However, it will not pose any usage problems even when they are removed.

Front

Rear

② Install the ceiling mounting brackets to the screw holes indicated by the arrows.

- Use screws that meet the specification.
- For details, contact your authorized dealer.

Front

Rear

Adjusting the Position

Adjusting the elevation angle of the projector

The height and inclination of the unit (0 to 5 mm) can be adjusted by turning the feet.
Lift the unit and adjust the four feet.

Connecting the Projector

- Do not turn on the power until connection is complete.
- The connection procedures differ according to the device used. For details, please refer to the instruction manual of the device to be connected.
- This projector is used for projecting images. To output the audio of connected devices, please connect a separate audio output device, such as an amplifier or speaker.
- Some cables cannot be connected to this unit due to the size of their connector cover.
- Configuration of a network password is necessary before connecting to the LAN terminal. For details, refer to "Network Password **VS45NVHB**" P. 53.

Connecting to the DisplayPort Terminals

- For single-channel input signals, connect to one of the [DisplayPort 1], [DisplayPort 2], [DisplayPort 3] or [DisplayPort 4] input terminals.
- For two-channel input signals, connect to the [DisplayPort 1] and [DisplayPort 3] input terminals.
- For four-channel input signals, connect to the [DisplayPort 1] to [DisplayPort 4] input terminals.
- ➔ "Types of Possible Input Signals" (P. 72)
- Video images may not appear if a cable that does not support HBR2 is used. Use a cable that supports HBR2.
- When disconnecting the DisplayPort cable, make sure to release the latch and unplug the cable.

Connecting to the LAN Terminal

- The network is used to control this unit. It is not used for sending or receiving video signals.
- Please contact your network administrator for information concerning the network connection.
- Configuration of a network password is necessary before connecting to the LAN terminal. For details, refer to "Network Password **VS45NVHB**" P. 53.
- For more information on control, please refer to "External Control" P. 65.

Connecting to the RS-232C Terminal

- For more information on control, please refer to “External Control”P. 65.

Connecting to the REMOTE Terminal

- For more details on the wired remote controller and connection cable, please consult your dealer.

Connecting the Power Cord (Supplied Accessory)

- ① Connect the power cord supplied to the power input terminal on the main unit
- ② Insert the supplied power plug into the wall outlet.

Precautions to prevent fire and electric shock

- The power consumption of this unit is large. Please connect it directly to the wall outlet.
- When you are not using the projector, please unplug the power cord from the outlet.
- Connect it using only the power cord supplied.
- Do not use a voltage other than the indicated power voltage.
- Do not damage, break or modify the power cord. Do not place a heavy object on the power cord, or heat or pull it. Doing so may damage the power cord.
- Do not unplug the power cord with wet hands.

Viewing Videos

Remote Control

This unit

MEMO

- Connect the power cord, and ensure that the “STANDBY/ON” indicator lights up in red.

1 Turn on the power

Remote control: press the **I** [ON] button

Projector unit: press the **⏻** button

“STANDBY/ON” lights up (red)
In standby state

“STANDBY/ON” lights up (green)
During startup

2 Choose the image to project

Remote control:

Button	Terminal
[INPUT 1]	DisplayPort 1
[INPUT 2]	DisplayPort 2
[INPUT 3]	DisplayPort 3
[INPUT 4]	DisplayPort 4
[DUAL]	Dual (*1)
[QUAD]	Quad (*2)

*1, *2: Refer to “Types of Possible Input Signals”P. 72

Projector unit: press the [INPUT] button to switch the input

- Play back the selected device to project the image.

To hide the image temporarily

Press the [HIDE] button on the remote control

- The “STANDBY/ON” indicator light starts to blink in green. When “LED Indication” is set to “Off”, the indicator does not blink.
- Press the [HIDE] button again to resume display of the image.
- The power cannot be turned off when the image is temporarily hidden.

3 Turn off the power

Remote control: press the  [STANDBY] button

Projector unit: press the /I button

- While the “Are you sure you want to turn off?” message is displayed, press the button again.
- The laser light source and IR light source turn off, and the “STANDBY/ON” indicator switches from a green light to a red blinking light.
- After the light goes off, the fan will run for about 10 seconds to cool down the light source (Cool-down mode). Do not disconnect the power cable while cooling is in progress.
- After about 10 seconds, the “STANDBY/ON” indicator switches from a blinking red to a solid red light.

“STANDBY/ON” blinking (red)
In the Cool-down mode

“STANDBY/ON” lights up (red)
In standby state

CAUTION

- The power cannot be turned off within approximately 30 seconds after it has been turned on.
- The power cannot be turned on again while cooling is in progress (10 seconds).
- Pull out the power plug when the unit is not to be used for a prolonged period of time.
- If the indication of indicator differs from the description, refer to “Indicator Display on the Main Unit”P. 77 for details.

Adjustments and Settings in the Menu

Pressing the [MENU] button displays the menu.

Press the [▲▼◀▶] keys to select an item, followed by pressing the [OK] button to confirm the selection.

List of Menu Items

Picture Adjust

---------------------	-------

Picture Adjust

Picture Mode

You can adjust the image quality according to the type of video image you are viewing.

Setting	Description
Natural	Image quality that focuses on natural color and gradation reproduction. Suitable for displaying video images in general.
Dynamic	This is the picture setting best suited for viewing the picture in a room that cannot be made completely dark.
User 1 to User 6	Enables user-defined image quality data to be saved and retrieved.

You can configure the following setting items by pressing the [MENU] button to display the menu, followed by selecting "Picture Adjust" → "Picture Mode" and pressing the [OK] button.

Sharpness

The sharpness of the image can be adjusted.

- Setting: 0 (low sharpness) to 50 (high sharpness)

Aperture

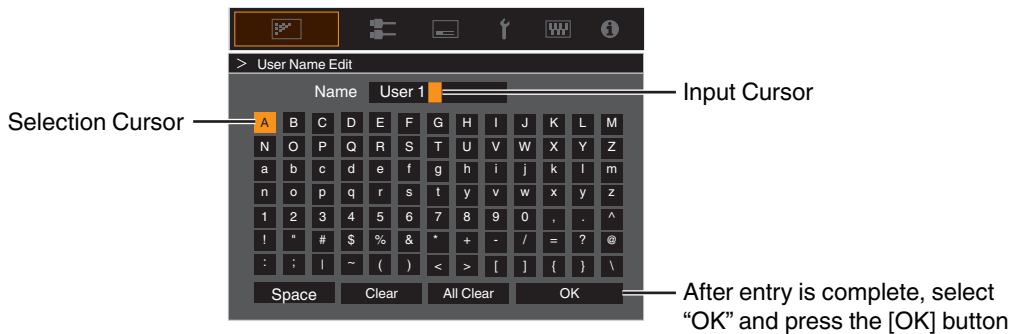

For changing the brightness through controlling the aperture.

- Setting range: -7 (stops down) to 0 (opens up)

User Name Edit

You can edit the "User 1" to "User 6" names in the Picture mode.

- Characters that are usable include alphabets (upper or lower case), numeric characters, and symbols.
- Enter not more than 10 characters.

Color Management

Each of the colors is adjustable according to the user's preference.

1 Select the "Picture Adjust" → "Color Management" menu, and press the [OK] button.

2 Set "Color Management" to "On", and press the [OK] button

3 Adjust to the preferred color

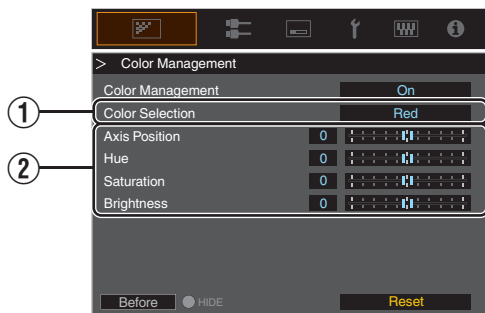

① Select "Color Selection", and press the ◀▶ keys to select the color to adjust

- For color adjustment, select the color from the following: "Red", "Yellow", "Green", "Cyan", "Blue", "Magenta".

② Adjust the selected color

Item	Setting Range	Description
Axis Position	-30 to 30	Fine-tune the position of the central axis of the selected color.
Hue	-30 to 30	Adjusts the hue (color tone).
Saturation	-30 to 30	Adjusts the color saturation (vividness). -30 (dull) to +30 (vivid)
Brightness	-30 to 30	Adjusts the brightness. -30 (dark) to +30 (bright)

- Selecting "Reset" resets all the adjustment data.
- Pressing the [HIDE] button on the remote control enables you to check the image before adjustment. Press the [HIDE] button again to return to the adjustment screen.

4 Press the [MENU] button to exit

Color Temp.

For setting the color temperature of the video image.

- The selectable “Color Temp.” settings vary according to “Picture Mode”.

“Color Temp.”

Color Temp.	Description
5500K	Increasing the value enhances the blue tone of the video image, while decreasing the value enhances the red tone.
6500K	
9500K	
High Bright	Color temperature that gives priority to brightness.
Custom 1 to Custom 2	The color temperature of video images can be adjusted manually and saved as one of the three customized settings.

List of selectable “Color Temp.” according to “Picture Mode”

Picture Mode	Color Temp.
Natural User 1 to User 6	5500K
	6500K
	9500K
	High Bright
	Custom 1 to Custom 2
Dynamic	High Bright

Correction Value

For setting the base color temperature for the adjustment of “Gain Red” / “Gain Green” / “Gain Blue” / “Offset Red” / “Offset Green” / “Offset Blue” when one of the “Custom 1” to “Custom 2” setting is selected in “Color Temp.”.

- The selectable correction values vary according to “Picture Mode”. (Refer to the table below.)

List of selectable “Correction Value” according to “Picture Mode”

Picture Mode	Correction Value
Natural User 1 to User 6	5500K
	6500K
	9500K
	High Bright
Dynamic	Not selectable

Gain Red / Gain Green / Gain Blue

Adjusts each color in the bright parts of the video image.

- Setting range: -255 (reduces the red/green/blue tone) to 0 (no adjustment)

Offset Red / Offset Green / Offset Blue

Adjusts each color in the dark areas of the video image.

- Setting range: -50 (reduces the red/green/blue tone) to 0 (no adjustment) to +50 (enhances the red/green/blue tone)
- Setting “Color Temp.” to “Custom 1” or “Custom 2” allows you to select and adjust a base correction value (initial value) for adjustment.

Gamma

You can adjust the output value of the projected image with respect to the video signal input.

“Gamma”

Gamma	Description
2.2	The gamma is set to “2.2”.
Custom 1 to Custom 3	Enables fine adjustment of gamma according to preference.

You can perform fine adjustments based on the selected gamma adjustment setting.

Correction Value

For setting the base Gamma for the adjustment of “Picture Tone” / “Dark Level” / “Bright Level” when one of the “Custom 1” to “Custom 3” setting is selected in “Gamma”.

- Setting: 1.8 to 2.6, Import

Adjustment item and its setting

Item	Description	Setting
Color Selection	For selecting the color for adjusting “Picture Tone”, “Dark Level” and “Bright Level”.	White / Red / Green / Blue
Picture Tone	Adjusts the overall brightness automatically for a well-balanced result without compromising the gradation of the image.	-16 (darkens image for an underexposed effect) to +16 (brightens image for an overexposed effect)
Dark Level	Adjusts the dark areas of the input image. • To do so, use the ◀▶ keys to move the cursor.	-7 (darkens the shadows) to +7 (brightens the shadows)
Bright Level	Adjusts the bright areas of the input image. • To do so, use the ◀▶ keys to move the cursor.	-7 (darkens the highlights) to +7 (brightens the highlights)

“IR Gamma” **VS45NVHB**

Configure the gamma curve at the time the IR light source is lit when “Display Mode” is set to “NV” or “NV(FS)”.

IR Gamma	Description
2.2	The gamma is set to “2.2”.
Custom 1 to Custom 3	Enables fine adjustment of gamma according to preference.

Correction Value

Enables fine adjustment of gamma when the setting from “Custom 1” to “Custom 3” is selected in “IR Gamma”.

- Setting: 1.8 to 2.6, Import

When “Correction Value” is set to “Import”

- By selecting “Import” for “Correction Value”, the gamma data created externally can be selected as the base setting value for adjustment.
- The factory setting for “Import” is “2.2”.
- You can use the calibration software to customize the gamma data adjustment, and import the created gamma data.

Please check with your authorized dealer for details.

Display Mode

For managing the e-shift status **VS47NV** and the lighting condition of the light sources.

Setting	Description
Normal	Only the laser light source lights up.
NV	Only the IR light source lights up.
e-shift VS47NV	This is the mode for displaying e-shift. Only the laser light source lights up.
NV(e-shift) VS47NV	This is the mode for displaying e-shift. Only the IR light source lights up.
NV(FS)	The laser light source and IR light source light up alternately frame by frame.
NV(e-shift FS) VS47NV	This is the mode for displaying e-shift. The laser light source and IR light source light up alternately frame by frame.
3D	This is the mode for displaying 3D videos.

- The selectable “Display Mode” settings vary according to input signal.

List of selectable “Display Mode” according to input signal **VS47NV**

Input Signal		Display Mode
Single (DP1-DP4)	24, 25, 30, 50, 60 Hz	Normal / NV
Dual - stripes	50, 60 Hz	
Quad - stripes	60 Hz	
Quad - cross		
Dual - frame sequential	100 Hz	Normal / NV / e-shift / NV(e-shift) / 3D
Dual - frame sequential	100 Hz	Normal / NV / e-shift / NV(e-shift) / 3D
Dual - stripes	120 Hz	Normal / NV / e-shift / NV(e-shift) / NV(FS) / NV(e-shift FS) / 3D
Quad - stripes		
Quad - cross		
Dual - frame sequential		
Quad - frame sequential		
No signal		Normal / e-shift
Out of range		Normal

List of selectable “Display Mode” according to input signal **VS45NV**

Input Signal		Display Mode
Single (DP1-DP4)	24, 25, 30, 50, 60 Hz	Normal / NV
Dual - stripes	50, 60 Hz	
Quad - stripes	60 Hz	
Quad - cross		
Dual - stripes	100 Hz	Normal / NV / NV(FS) / 3D
Quad - stripes	120 Hz	
Quad - cross		
Dual - frame sequential		
Quad - frame sequential		
No signal		Normal
Out of range		Normal

List of selectable “Display Mode” according to input signal **VS45NVHB**

Input Signal		Display Mode
Single (DP1-DP4)	24, 25, 30, 50, 60 Hz	Normal / NV
Dual - stripes	50, 60 Hz	
Quad - stripes	60 Hz	
Quad - cross		
Dual - frame sequential	100 Hz	Normal / NV / 3D
Dual - stripes	120 Hz	Normal / NV / NV(FS) / 3D
Quad - stripes		
Quad - cross		
Dual - frame sequential		
Quad - frame sequential		
No signal		Normal
Out of range		Normal

e-shift polarity **VS47NV**

For switching the polarity of e-shift.

Setting	Description
Positive	Activates e-shift using positive polarity signal.
Negative	Activates e-shift using negative polarity signal.

- This function cannot be used except when “Display Mode” is set to “e-shift”, “NV(e-shift)”, “NV(e-shift FS)” or “3D”.

IR Enhance Mode

For switching the function to support the power of the IR light source.

Setting	Description
Off	Disables the support function.
On	Enables the support function.

Light Source Ctrl

For switching the function to automatically control the current of the laser light source.

Setting	Description
Manual	For configuring the current setting manually.
Auto Intensity	Controls the current automatically to maintain the brightness at a constant level.
FEDLC	Detects the current information that is included in the input image and controls the current automatically.

LD Current

For controlling the brightness of the laser light source by controlling the current of the laser light source.

- Setting range: 38 to 100 **VS45NV VS47NV**
- Setting range: 38 to 107.5 **VS45NVHB**
- * This function cannot be used when “Light Source Ctrl” is set to “Auto Intensity” or “FEDLC”.

LD Power

For switching the brightness by controlling the number of laser to turn on.

- Setting this item to “Low” or “Mid” may cause the video image to become blurry. This is not a malfunction. If you are bothered by the blurry images, set this to “High”.

Setting	Description
Low	Brightness (low)
Mid	Brightness (mid)
High	Brightness (high)

IR Current

For controlling the brightness of the IR light source by controlling the current of the IR light source.

- Setting range: 38 to 100

Crosstalk Adjust

For correcting the crosstalk of the projected images of the IR light source and laser light source when “Display Mode” is set to “NV(FS)” or “NV(e-shift FS)”. When “Display Mode” is set to “3D”, it corrects crosstalk between the left-eye and right-eye images.

LD Gain

For adjusting the gain level for the correction amount of the laser light source.

- Setting range: -8 to 8

IR Gain

For adjusting the gain level for the correction amount of the IR light source.

- Setting range: -8 to 8

Blur Reduction

For reducing the after-image, which occurs in a fast-moving scene.

- Blur Reduction is grayed out and cannot be adjusted when “Display Mode” is set to “NV(FS)”, “NV(e-shift FS)” or “3D” and when an out of range signal is input.

Clear Motion Drive

For reducing the after-image, which occurs in a fast-moving scene.

- Pressing the [C.M.D.] button each time switches the mode in the following sequence: “Off” → “Mode 1” → “Mode 2” → “Mode 3”→“Off”...

* C.M.D. is the abbreviation for Clear Motion Drive.

Setting	Description
Off	Doubles the frame rate of the input image by drawing the original image twice.
Mode 1	Displays the image as it is at the frame rate of the input image.
Mode 2	Displays the image as it is at the frame rate of the input image. Applies black insertion to reduce blurriness in the video images.
Mode 3	Reduce blurriness in the video image by applying black insertion to the Off mode.

Motion Enhance

You can reduce motion blur with this function enhancing the response of D-ILA image devices.

If the image outline is unnatural, set this item to “Off”.

Setting	Description
Off	Does not perform correction.
On	Reduces image blurring.
Gain	When Motion Enhance is set to “On”, the overall intensity is adjusted using Gain, while adjustment of each color is performed using Red/Green/Blue.
Red	
Green	
Blue	

Contrast

For adjusting the white level point to avoid clipping or over saturation.

- Setting range: -50 (little difference in brightness) to +50 (large difference in brightness)

Brightness

For adjusting the black level point to avoid clipping or over saturation.

- Setting range: -50 (darker) to +50 (brighter)

Color

For adjusting the color density of the video image.

- Setting range: -50 (lighter) to +50 (deeper)

Tint

For adjusting the hue of the video image.

- Setting range: -50 (reddish) to +50 (greenish)

Input Signal

Input Level

For setting the dynamic range (gradation) of the video input.

- If the dynamic range is not appropriate, the bright areas become overexposed, and the dark areas become underexposed.

Setting	Description
16-235 (Video)	Select this setting if you are inputting video signals (dynamic range: 16 - 235).
0-255 (PC)	Select this setting if you are inputting PC signals (dynamic range: 0 - 255).

Color Space

For setting the color space of the input signal.

Setting	Description
YCbCr444	Select this setting when inputting YCbCr (4:4:4) video signals.
YCbCr422	Select this setting when inputting YCbCr (4:2:2) video signals.
RGB	Select this setting when inputting RGB video signals.

Channel Hide

A function for configuring whether to display video images for each DisplayPort input terminal.

Setting	Description	
DP 1	Off	Displays video images with the Hide function disabled.
DP 2	On	Enables the Hide function and does not display video images.
DP 3		
DP 4		

3D Setting

For performing 3D settings.

Polarity

This is the function to switch the signal polarity output from Sync Out for synchronizing the glasses.

Setting	Description
Positive	Sets the signal polarity for synchronization to positive.
Negative	Sets the signal polarity for synchronization to negative.

Sync Phase

This is the function to adjust the signal phase output from Sync Out for synchronizing the glasses.

- Setting range: 0 (0°) to 18 (180°)

Installation

Lens Control

Focus / Zoom / Shift

For adjusting the lens according to the projection position

MEMO

To use the Shift function, a motorized lens shift unit is required. For details on installing the motorized lens shift unit (sold separately), refer to the instruction manual of the motorized lens shift unit.

Motorized lens shift unit (product no.: PK-MLS01)

- 1 Press the [LENS CONTROL] button, and use the [\blacktriangle \blacktriangledown \blacktriangleleft \blacktriangleright] keys to adjust Focus, Zoom (screen size), and Shift (screen position)

- Pressing the [LENS CONTROL] or [OK] button each time switches the mode in the following sequence: “Focus” → “Zoom” → “Shift” → “Focus”...

- If the driving range of the motorized lens shift unit is exceeded, the projected screen cannot be shifted anymore when the lens reaches the end.
- Pressing and holding the [\blacktriangle \blacktriangledown \blacktriangleleft \blacktriangleright] keys continuously after the projected screen cannot be shifted anymore will overload the motor causing malfunction.

- 2 Press the [MENU] button once, or the [BACK] twice, to end adjustment

Image Pattern

For setting whether to display the lens adjustment pattern.

Setting	Description
Off	Displays external signals, and does not display the lens adjustment pattern.
On	Displays the lens adjustment pattern.

Pixel Adjust

For correcting the phase shifting between each RGB color by adjusting the pixel.

Adjust

For setting the adjustment feature to On or Off.

Adjust Area

Setting	Description
Whole	Adjusts the entire image.
Zone	Enables fine adjustment of each area by dividing the screen evenly into 10 vertical and horizontal zones.

Adjust Color

For selecting the color to adjust (“Red” or “Blue”).

Adjust Pattern

Setting	Description
Off	Displays the external signals without displaying the test pattern for adjustment.
On	Displays the test pattern for adjustment.

Adjust Pattern Color

For setting the color of the adjustment pattern displayed during adjustment to “White” or “Yellow / Cyan”.

Adjust (Pixel)

When “Adjust Area” is set to “Whole”, adjustment can be made by moving in units of one pixel on the screen of the color selected in “Adjust Color”.

➔ “Whole Adjust (Pixel) Operation Procedure” (P. 43)

- Adjustment cannot be made when “Adjust Area” is set to “Zone”.
- Adjustment cannot be made when “Mode” of “Auto Geometry Stabilizer” is configured to “On”.

Setting	Description
H (Horizontal)	Setting range: -2 (moves red/blue to the left) to +2 (moves red/blue to the right)
V (Vertical)	Setting range: -2 (moves red/blue downward) to +2 (moves red/blue upward)

Adjust (Fine)

When “Adjust Area” is set to “Whole”, adjustment can be made by moving in units of 1/8 pixel on the screen of the color selected in “Adjust Color”.

➔ “Whole Adjust (Fine) Operation Procedure” (P. 44)

When “Adjust Area” is set to “Zone”, the screen is divided evenly into 10 vertical and horizontal zones, and fine adjustment of each area is possible.

➔ “Zone Adjust Operation Procedure” (P. 45)

Setting	Description
H (Horizontal)	Setting range: -31 (moves red/blue to the left) to +31 (moves red/blue to the right)
V (Vertical)	Setting range: -31 (moves red/blue downward) to +31 (moves red/blue upward)

Reset

Restores all pixel adjustment data to the factory default.

Whole Adjust (Pixel) Operation Procedure

For making general adjustments to slight color fringing in the horizontal/vertical directions of the video image.

- ① Set “Adjust Area” to “Whole”
- ② Select “Adjust Color” and “Adjust Pattern Color”
- ③ Select “Adjust (Pixel)”, and press the [OK] button
 - The Adjustment mode is activated, and the selected adjustment pattern and Adjustment (Pixel) window are displayed.

- ④ Use the [▲▼◀▶] keys to move and adjust the vertical and horizontal pixels of the entire zone
 - The adjustment setting appears at the center of the Adjustment (Pixel) window.

- ⑤ After adjustment is complete, press the [BACK] button twice to exit the Adjustment mode

Remote Control Operation Guide

Button Name	Function	Description of Operation
[GAMMA]	Color A.	Changes “Adjust Color”.
[COLOR TEMP.]	Adjust	Switches between “Adjust (Pixel)” and “Adjust (Fine)”. • Switches to “Adjust (Pixel)” when “Adjust Area” is set to “Zone”.
[LENS AP.]	Color P.	Changes “Adjust Pattern Color”.
[PIC ADJ.]	A. Area	Switches “Adjust Area”. • A zone cursor appears on the adjustment pattern when the “Zone” setting is selected.

Whole Adjust (Fine) Operation Procedure

For making general adjustments on the misalignment of the entire screen using “Adjust (Pixel)”, followed by making fine adjustments.

- ① Set “Adjust Area” to “Whole”
- ② Select “Adjust Color” and “Adjust Pattern Color”
- ③ Select Adjust (Fine), and press the [OK] button
 - The Adjustment mode is activated, and the selected adjustment pattern and Fine window are displayed.
 - The adjustable range may be smaller depending on the pixels being adjusted on the entire screen.

- ④ Use the [▲▼◀▶] keys to move and adjust the vertical and horizontal pixels of the entire zone
 - The adjustment setting appears at the center of the Fine window.

- ⑤ After adjustment is complete, press the [BACK] button twice to exit the Adjustment mode

MEMO

- If both the maximum overall screen misalignment of H (horizontal direction) and V (vertical direction) are “31”, you cannot select a value that is larger than the displayed setting even when the adjustment setting is lower than the maximum value.
- If the minimum overall screen misalignment is “-31”, you cannot select a value that is smaller than the displayed setting even when the adjustment setting is higher than the minimum value.

Zone Adjust Operation Procedure

For fine-tuning misalignments on a part of the screen after adjusting the overall screen misalignment using “Adjust (Pixel)” and “Adjust (Fine)”.

- The screen can be divided vertically and horizontally into 10 sections for partial adjustments to be made.
- ① Set “Adjust Area” to “Zone”
 - ② Select “Adjust Color” and “Adjust Pattern Color”
 - ③ Select Adjust (Fine), and press the [OK] button
 - The Adjustment mode is activated, and the selected adjustment pattern and Zone Adjustment window are displayed.
 - The adjustable range may be smaller depending on the pixels being adjusted on the entire screen.

- ④ Press the [▲▼◀▶] keys to move the cursor to the point to be adjusted
- ⑤ Press the [OK] button to enter the Adjustment mode
- ⑥ Use the [▲▼◀▶] keys to move and adjust the vertical and horizontal pixels of the entire zone
 - The adjustment setting appears at the center of the Zone Adjustment window.

- ⑦ After adjustment is complete, press the [BACK] button twice to exit the Adjustment mode

Mask

For hiding the peripheral area of the image with a mask (black strip).

Setting	Description
Off	Not masked.
On	Hides the ranges specified in “Top”, “Bottom”, “Left” and “Right” by masking (with black strips).

■ Off

■ On

Mask: black strip around the periphery

“Top” / “Bottom” / “Left” / “Right”

For specifying the ranges to hide by masking (with black strips).

- Setting range: 0 to 220

Distortion Correction

Corrects distortion of the screen.

Distortion Correction

For setting the adjustment feature to On or Off.

Adjust Pattern Color

For setting the color of the adjustment pattern displayed during adjustment to “White” or “Green”.

Adjust Pattern

Setting	Description
Off	Displays the external signals without displaying the test pattern for adjustment.
On	Displays the test pattern for adjustment.

Adjust

Displays the adjustment screen.

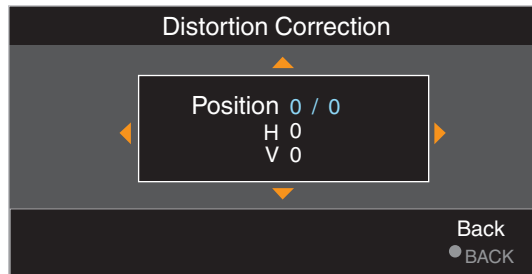

- Setting range: -64 to 63

Operation procedure for Adjust

- ① Select "Adjust Pattern Color"
- ② Select "Adjust", and press the [OK] button
 - The Adjustment mode is activated, and the selected adjustment pattern and Adjustment window are displayed.

- ③ Select the position to compensate by using the [▲▼◀▶] keys to move the cursor, followed by pressing the [OK] button.
- ④ Use the [▲▼◀▶] keys to set the compensation value
 - Pressing the [OK] button each time switches the setting item in sequence. "Position" → "H" → "V" → "Position"...
 - The item that is currently being set is displayed in blue.
 - A red cursor is displayed when setting the position. A blue cursor is displayed when setting the compensation value.

- ⑤ After adjustment is complete, press the [BACK] button to exit the Adjustment mode

MEMO

- Noise may occur during adjustment. This is not a malfunction.

Edge Blending

Corrects the seam between the images during projection by multiple projectors.

- * This function is disabled when "Picture Mode" is set to "Dynamic".

Edge Blending

For setting the function to On or Off.

Setting	Description
Off	Disables the Edge Blending function.
On	Enables the Edge Blending function.

Guide

For setting the guideline display (start point: green; end point: red).

Setting	Description
Off	Hides the guideline.
On	Displays the guideline.

Position Select

For setting the compensation position.

Setting	Description
Top	For setting the start and end points using the Start/End item.
Bottom	
Left	
Right	

Start/End

For setting the start and end points of the compensation position selected in "Position Select".

- Setting range: 0 to 255 (left/right), 0 to 135 (up/down)

Black Level

For adjusting the black level.

- Setting range: 0 to 50

Installation Style

For setting to "Front", "Ceiling Mount (F)", "Rear", or "Ceiling Mount (R)" according to the installation status of the projector.

- "Front" or "Ceiling Mount (F)" is set when projector is installed in the front with respect to the screen.
- "Rear" or "Ceiling Mount (R)" is set when projector is installed in the rear with respect to the screen.
- * When using the projector with the lens shifted in the vertical direction, the amount of distortion at the upper and lower ends may be different and the curvature distortion may not be fully corrected.

LED Indication

When “LED Indication” is set to “Off”, the LED indicator does not light up or blink under the following status.

- When the time to replace the laser light source or IR light source is near. (P. 55)
- When HIDE is on. (P. 77)
- When the projector receives a signal from a remote control which is set to a different code mode (A or B). (P. 53)

High Altitude Mode

For setting the high altitude mode to “On” or “Off”.

Set to “On” when using the projector at a location of low atmospheric pressure (higher than 900 m above sea level).

Auto Geometry Stabilizer

For correcting the phase shifting between each RGB color due to the temperature according to the duration after starting up.

Phase shift correction is performed every minute for 120 minutes from startup according to the preconfigured correction value.

- When this function is used, up to 4 pixels on either the left or right end will be missing depending on the amount of correction.

Mode

For configuring the correction feature to On or Off.

- The menu options under “Adjust” are not available when “Mode” is configured to “Off”.
- “Adjust (Pixel)” of “Pixel Adjust” is not available when “Mode” is configured to “On”.

Adjust Pattern

Setting	Description
Off	Displays the external signals without displaying the test pattern for adjustment.
On	Displays the test pattern for adjustment.

Adjust

For configuring the correction value according to the current time.

- Correction values can be configured for up to four points.
- After configuration of the correction values for the four points is complete, “Adjust” will not be selectable. To configure the setting, do so after erasing the unwanted correction values.

Setting	Description
H (Horizontal)	Setting range: -4 (moves Red/Green/Blue to the left) to +4 (moves Red/Green/Blue to the right)
V (Vertical)	Setting range: -4 (moves Red/Green/Blue downward) to +4 (moves Red/Green/Blue upward)

Point 1 to 4

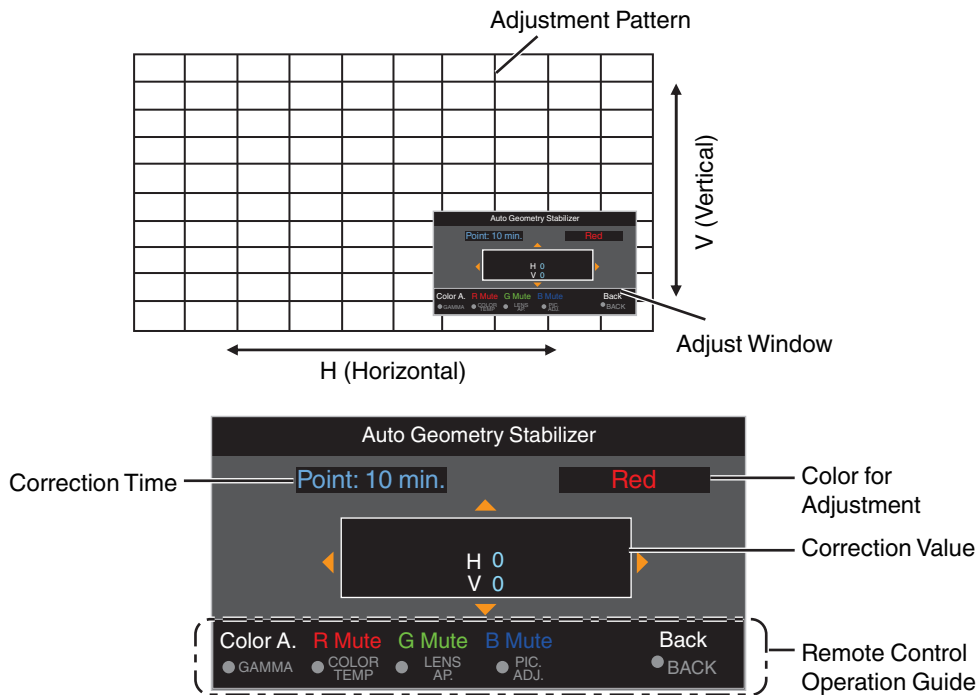

For editing or erasing preconfigured correction values directly.

The configured time is displayed in “Point 1 to 4” after configuration of the correction values is complete.

Reset

For erasing the preconfigured correction values in Point 1 to 4.

Operation procedure on the Adjust Screen

- ① Select "Adjust", and press the [OK] button to display the adjustment screen.
- ② Configure the correction value by using the [▲▼◀▶] keys to move the vertical and horizontal pixels.
- ③ Press the [GAMMA] button on the remote control to switch the color to adjust. (Red→Green→Blue)
- ④ Press the [COLOR TEMP.] / [LENS AP.] / [PIC ADJ.] button on the remote control to switch between showing and hiding the image for each RGB color.
- ⑤ After adjustment is complete, press the [BACK] button to exit the adjustment screen.

Remote Control Operation Guide

Button Name	Function	Description of Operation
[GAMMA]	Color A.	For selecting the color for adjusting.
[COLOR TEMP.]	R Mute	Switches between showing and hiding the R signal.
[LENS AP.]	G Mute	Switches between showing and hiding the G signal.
[PIC ADJ.]	B Mute	Switches between showing and hiding the B signal.

Display Setup

Back Color

For setting the color of the background to “Blue” or “Black” when there is no signal input.

Menu Position

For setting the display position of the menu.

Signal Display

For setting the display of the input information to “On” or “Off”.

Setting	Description
Off	Not displayed.
On	Shows the input terminal for 5 seconds when input is switched.

Logo

For setting the display of logo during startup to “On” or “Off”.

Setting	Description
Off	Not displayed.
On	Displays the “D-ILA” logo for 5 seconds during startup.

NV Menu Display

For turning on the laser light source when displaying the menu when the projector is configured to project only with the IR light source (*).

- Does not function except when “Display Mode” is set to “NV” or “NV(e-shift)” and “IR Enhance Mode” is set to “Off”.
* “Display Mode” is set to “NV” or “NV(e-shift)” and “IR Enhance Mode” is set to “Off”.

Setting	Description
Off	Turns off the laser light source when displaying the menu.
On	Turns on the laser light source when displaying the menu.

Function

Sync Out

For selecting the type of signal to output from Sync Out.

Setting	Description
Input (Positive)	Outputs a signal that is synchronized with the vertical sync signal of the input video signal. (*1)
Input (Negative)	Outputs a signal with reversed polarity that is synchronized with the vertical sync signal of the input video signal. (*1)
Low	Fixes the output at Low.(*2)
High	Fixes the output at High.(*2)
FEDSC	Outputs a signal that is synchronized with the polarity information included in the FEDSC packet. Outputs a Low when there is no FEDSC packet.

*1 Outputs the e-shift driving waveform if “e-shift” is set to “On(Positive)”, “On(Negative)” or “On(FEDEC)”.

*2 Does not function when “Display Mode” is set to “NV(FS)”.

- 3D sync signal is output during 3D signal input regardless of this setting. Output signal varies as follows according to the format of the 3D signal.

Input Signal	Output Signal
Dual, Quad (frame sequential)	Outputs a signal that is synchronized with the input video signal.
Dual, Quad (stripes)	Outputs a signal that is synchronized with the polarity information included in the FEDSC packet.

Polarity switches to the setting in “3D Setting” → “Polarity”.

Off Timer

For setting the duration before the power turns off automatically when the projector is not operated.

- Setting values: “Off”, “1 Hour”, “2 Hours”, “3 Hours” and “4 Hours”
- * The setting will be retained even after the Off Timer operation has completed.

Network

For specifying the settings for external control from a PC or smartphone.

Setting	Description	
DHCP Client	On	Obtains the IP address automatically from the DHCP server inside the connected network.
	Off	For configuring the network settings manually.
IP Address	For configuring the IP address.	
Subnet Mask	For configuring the subnet mask.	
Default Gateway	For configuring the default gateway.	
MAC Address	Displays the MAC address of the unit.	
Set	Applies the network settings.	

Glossary of Network Terminology

- DHCP** : Abbreviation for Dynamic Host Configuration Protocol. This is a protocol for the network to assign an IP address automatically to the connected device.
- IP Address** : Numeric characters for identifying the device that is connected to the network.
- Subnet Mask** : Numeric characters that define the bit count used for the network address that is a segment of the IP address.
- Default Gateway** : Server for communicating beyond the network that is divided by the subnet mask.
- MAC Address** : Abbreviation for Media Access Control address. This is a number that is unique to each network adapter. Each of the network adapters is assigned with a unique MAC address.

Network Password VS45NVHB

For configuring the password during LAN connection.

- Characters that are usable include alphabets (upper or lower case), numeric characters, and symbols.
- Enter a password with at least 8 characters and not more than 10 characters.

CAUTION

- Configuration of a network password is necessary before connecting to the LAN terminal.

Remote Code

For changing the remote control code.

Setting	Description
A	Change the remote control code from “B” to “A”.
B	Change the remote control code from “A” to “B”.

- You need to configure the remote control according to the settings of this unit.
On the remote control unit, press the [MENU] and [BACK] buttons at the same time for three seconds or longer to switch the code.
 - The backlight of the remote control blinks 3 times: change the remote control code to “A”
 - The backlight of the remote control blinks 2 times: change the remote control code to “B”
- If the setting differs between this unit and the remote control, the “STANDBY/ON” indicator blinks in green when receiving the remote control code.

Hide Mode

For reducing the power consumption by turning off the laser light source or lowering the current when the [HIDE] button is pressed to hide the image temporarily.

Setting	Description
Off	Do not suppress the current supply when the [HIDE] button is pressed to hide the image temporarily.
On	Reduces the power consumption by turning off the laser light source when the [HIDE] button is pressed to hide the image temporarily.

Software Update

For performing a software update.

For the latest information on the software, refer to <https://www3.jvckenwood.com/english/download/>.

Information

Page 1

Setting	Description
Input	Displays video input terminal.
Status	Displays the image output status.
Resolution (DP 1 / DP 2 / DP 3 / DP 4)	Displays the resolution information of signal input to each of the DP 1 to DP 4 terminals.
Light Source Time	Displays the laser light source time.
Soft Ver.	Displays the firmware version.

Pages 2 to 5

Setting	Description
DP 1 to DP 4	Displays the terminal for which the corresponding information is displayed.
Resolution	Displays the image resolution.
H Frequency	Displays the horizontal frequency.
V Frequency	Displays the vertical frequency.
Color Depth	Displays the color bit depth of the input video signal. <ul style="list-style-type: none">• Not displayed when YCbCr (4:2:2) is input.• Displayed when Deep Color information is received from the source device.
Color Space	Displays the Color Space detected by AVI Info frame.
Link Rate	Displays the transmission frequency of the input signal.
Lane Count	Displays the number of lanes used for the input signal.

Maintaining the Cabinet and Remote Control

- Gently wipe off dirt on the cabinet with a soft cloth.
- If it is extremely dirty, wet a cloth in water, wring dry and use it to wipe off the dirt, followed by wiping again with a dry cloth.
- Pay attention to the following as the cabinet may deteriorate in condition or the paint may come off.
 - Do not wipe with thinner or benzine
 - Do not allow prolonged contact with rubber or plastic products
 - Do not spray volatile chemicals such as insecticide

Cleaning and Replacing the Filter

Clean the filter regularly. Using a filter without cleaning may reduce the brightness of the image. Dirt that enters the unit may also appear as shadows on the image.

- 1** Loosen the 4 screws and remove the cover
 - The screws cannot be removed from the cover. Do not try to remove the screws from the cover by force.
- 2** Remove the sponge filter
- 3** Use a vacuum cleaner to remove dirt from the sponge filter carefully
- 4** Restore the sponge filter
- 5** Restore the cover and fasten the 4 screws

CAUTION

- Do not wash the air filter with water. Doing so may cause the filter to deteriorate.
- Make sure to attach the air filter and sponge filter in the correct sequence.

MEMO

- If the air filter or sponge filter is damaged and requires replacement, or if dust gets into the unit, consult your authorized dealer or nearby service center.
- Air filter
Product no.: F1K-0062-00
- Sponge filter
Product no.: J3K-0049-00

Long-term Storage of the Projector

If projector is to be stored or not powered up from more than 3 month, it is recommended that the projector be stored in a sealed bag with desiccant.

CAUTION

- 1) If projector is run on a normal cycle weekly or powered on for at least 8 hours every 90 days, no action is required.
 - 2) Desiccant should be changed every year or sooner if exposed to humid environment.
- Desiccant
Product no :LC43436-001A
 - Sealed bag
Product no :LC43435-002A

About the Lens

- This projector does not come with a projection lens.
To use the projector, please mount a projection lens according to your requirements.
- When using an optional standard zoom lens or short focus lens, a spacer and shift plate are required. Use the spacer that comes with this unit. The shift plate varies depending on the tilting angle of the lens so please contact our sales representative.
- To use the Shift function, a motorized lens shift unit is required. (Sold separately)
<Optional Extras>
Standard zoom lens (product no.: GL-MZ4014SZ)
Short focus lens (product no.: GL-MZ4009SZ)
Motorized lens shift unit (product no.: PK-MLS01)

Mounting the Lens

When installing the lens using the shift plate, do so according to the following procedures.
When using the optional motorized lens shift unit (PK-MLS01), refer to its instruction manual.

CAUTION

- Before attaching the lens, check to make sure that the power of the projector is not turned on and the power cord is not connected. Failure to do so may cause electric shock or injuries.
- When using the projector in an environment where vibration occurs continuously, tighten the mounting screws periodically or apply treatment to the screws for mounting before use to prevent them from loosening.
* The recommended tightening torque for the screws for mounting the lens is 1.47N·m (15kgf·cm).

1 Unscrew the 4 screws using a Phillips screwdriver to remove the front cover

2 Unscrew the screw using a Phillips screwdriver to remove the front plate

3 Secure the lens spacer to the shift plate using the supplied screws

4 Attach the spacer and insert lens

- Attach the Lens Spacer and Shift Plate to the Lens Holder and fasten using the 4 screws packed with Lens Spacer using a Phillips screwdriver.
- Insert the lens with the connector rightward.

5 Connect the motor cable

- Connect the motor cable (20pin) to lens.

CAUTION

- Keep the cable away from the motor gear when clamping the motor cable.

6 Tighten the 4 screws using the Phillips head screwdriver to fasten the lens

- Use the screws that comes with the lens.
- * The recommended tightening torque for the screws for mounting the lens is $1.47\text{N} \cdot \text{m}$ ($15\text{kgf} \cdot \text{cm}$).

7 Clamp the motor cable

8 Attach the front cover, and fasten using the 4 screws using a Phillips screwdriver

Troubleshooting

Before sending the unit to your authorized dealer for repair, please check the following points.

The following symptoms are not malfunctions.

You do not need to worry about the following symptoms if there is no abnormality on the screen.

- A part of the top or front surface of the unit is hot.
- A creaking sound is heard from the unit.
- An operating sound is heard from the inside of the unit.
- Color smear occurs on some screens.

This unit is a digital device. This unit may become unable to operate normally due to external static or noise. Perform the following operations when such malfunctions occur.

- ① If the unit is in the Standby mode, pull out the power plug, followed by inserting it again
- ② Press the  button on the projector unit to turn on the power again

Power is not supplied

Check	Action	Refer to
Is the power cord disconnected?	Insert the power cord (plug) firmly.	P. 27
Is the unit in the Cool-down mode?	After exiting the Cool-down mode, turn on the power again.	P. 29

Power shuts down automatically

Check	Action	Refer to
Has "Off Timer" been configured?	Set "Off Timer" to "Off".	P. 52
Are the air inlets and exhaust vent blocked?	Leave proper clearance when installing the unit.	P. 17, 22
Is there a large amount of dirt attached to the sponge filter?	Remove the dirt using a vacuum cleaner.	P. 56

Video image does not appear

Check	Action	Refer to
Is the correct external input selected?	Select the correct external input terminal.	P. 28
Is the power of the AV device or PC turned on?	Turn on the power of the AV device or PC and play the video.	P. 26
Is the AV device or PC properly connected?	Connect the AV device or PC properly.	P. 26
Are the correct signals being output from the AV device or PC?	Set the AV device or PC properly.	P. 26
Is an intermediate device (AV amplifier, divider, etc.) in use?	Change the sequence of turning on the source device, intermediate device and the projector. And after turning on each device, ensure that the signal output is stable before turning on the next device.	P. 26
Is "Display mode" set to "NV" or "NV(e-shift)" VS47NV ?	When "Display mode" is set to "NV" or "NV(e-shift)" VS47NV , a device that can see infrared light is required. Set "Display mode" to a value other than "NV" or "NV(e-shift)" VS47NV . Setting "NV Menu Display" to "On" turns on the laser light source when displaying the menu even when the projector is configured to project only with the IR light source. And if the input terminal is not connected or if there is no signal though the input terminal is connected, "Display mode" will be forcibly switched to "Normal" or "e-shift" VS47NV .	P. 36, P. 51

3D images do not appear

Check	Action	Refer to
Is an intermediate device (AV amplifier, divider, etc.) in use?	Connect the source device to the projector directly, and check whether there is any improvement in the condition. If the condition improves, it is likely that this is not caused by malfunction of the projector.	—
Is the power of the 3D Glasses turned on?	Check the power of the 3D Glasses.	Check the instruction manual of the 3D Glasses.

3D video image looks unnatural

Check	Action	Refer to
Are there overlapping video images?	If there are overlapping video images partially, this is due to the crosstalk phenomenon. Adjust “Crosstalk Cancel” and “Sync Phase”.	P. 40

Video image looks unnatural

Colors are unnatural

Check	Action	Refer to
Is the color space of the input signal correctly set?	The color may turn out unnatural when the input signal is different from that in the projector setting. Set the “Color Space” for “Input Signal” correctly.	P. 40
Is the image correctly adjusted?	Adjust “Color” and “Tint” accordingly.	P. 39
Is the AV device or PC properly connected?	Connect the AV device or PC properly.	P. 26

* The video image may appear slightly reddish immediately after starting up. This is not a malfunction.

Video image is fuzzy

Check	Action	Refer to
Is the focus correctly adjusted?	Adjust the focus.	P. 41
Is the unit placed too near or too far away from the screen?	Set the unit at a correct distance from the screen.	P. 70

Video image flickers

Check	Action	Refer to
Are you viewing the video images under a fluorescent light?	This is caused by interference between the 3D glasses with the flickers of the fluorescent light. View with the fluorescent light turned off.	—

Projected image is dark

Check	Action	Refer to
Is the laser light source near exhaustion?	Check the laser light source time in the "Information" menu. If 20,000 hours have elapsed, the brightness will be half the brightness at shipment.	P. 55
Is the aperture closed?	Increase the value of the "Aperture" setting.	P. 32
Is the value of the "LD Current" setting small?	Increase the value of the "LD Current" setting.	P. 38

Striped patterns appear on the screen

Check	Action	Refer to
Does the fabric of the screen have a regular pattern?	Interference fringes may sometimes occur between the fabric pattern and the pixels. Please consult the authorized dealer.	—

Video images are missing

Check	Action	Refer to
Has screen mask been configured?	Set "Mask" to "Off".	P. 46

The video images are overlapping

Check	Action	Refer to
Is "Crosstalk Cancel" adjusted?	If there are overlapping video images partially, this is due to the crosstalk phenomenon. In this case, adjust "Crosstalk Adjust" accordingly.	P. 38

Zoom or focus does not work

Check	Action	Refer to
Is the lens replaced?	Depending on the lens position, the lens may not work when it has been replaced. While at the Focus / Zoom adjustment screen, press and hold the ▲ or ▼ key for 2 seconds or longer. Doing so will allow the lens to recover from this condition.	P. 41

Remote control does not work

Check	Action	Refer to
Are the batteries correctly loaded?	Match the polarities (⊕ ⊖) correctly when loading the batteries.	P. 20
Are the batteries exhausted?	Replace with new batteries.	P. 20
Is there an obstructing object between the remote control and remote sensor?	Remove any obstructing object.	P. 20
Is the remote control held too far away from the unit?	Hold the remote control closer to the sensor during use.	P. 20

Noise is heard

Check	Action	Refer to
Is the exhaust vent blocked? Is the unit used near a heater or air-conditioner?	Check the installation condition of the projector. When the surrounding temperature of the projector is high, the fan revolution speed increases to protect the projector unit, hence a louder operating sound.	P. 22

Unable to connect to LAN terminal

Check	Action	Refer to
Has a network password been configured? VS45NVHB	Configuration of a network password is necessary before connecting to the LAN terminal. Configure the network password.	P. 53

There are small black or colored dots on the screen

The D-ILA device is manufactured using high-precision technologies, but there may be some (less than 0.01%) missing pixels or pixels that remain permanently lit. This is not a malfunction.

When the Following Messages Appear...

Message	Description	Action
	<ul style="list-style-type: none"> No device is connected to the input terminal. The input terminal is connected but there is no signal. 	Input the video signals.
	A video signal that cannot be used with this unit has been input (the names of input terminals such as "DP 1" will be displayed in yellow).	Input video signals that can be used. (P. 72)

External Control

It is possible to control this unit by connecting it to a PC using an RS-232C cross cable (D-sub 9-pin). The projector can be controlled by connecting it to a PC through the computer network with a LAN cable for control commands to be sent to the projector.

➔ “ Network ” (P. 52)

- Please use it after you have gained proper understanding from professional books or consulting the system administrator.

RS-232C Specifications

Pin No.	Signal	Function	Signal Direction
2	RxD	Receive data	PC → This unit
3	TxD	Transmission data	This unit → PC
5	GND	Signal ground	—
1, 4, 6 - 9	N/C	—	—

- PC refers to the controller, such as a personal computer.

Mode	Non-synchronous
Character length	8 bit
Parity	None
Start bit	1
Stop bit	1
Data rate	19200 bps
Data format	Binary

TCP/IP Connection

Before controlling via LAN, it is necessary to establish connection of the TCP layer by a “3-way handshake”, followed by sending out “PJREQ” and receiving “PJACK” within five seconds after the projector sends out “PJ_OK” for connection authentication.

If you are unable to complete sending within five seconds, or when “PJ_NG” or “PJNAK” is received, check the operating status of the projector, followed by performing the steps again starting from establishment of a TCP connection.

Command Format

The command between this unit and the computer consists of “Header”, “Unit ID”, “Command”, “Data” and “End”.

- Header (1 byte), Unit ID (2 bytes), Command (2 bytes), Data (n bytes), End (1 byte)

Header

This binary code indicates the start of communication.

Binary Code	Type	Description
21	Operating command	PC → This unit
3F	Reference command	PC → This unit
40	Response command	This unit → PC
06	ACK	This unit → PC (returns to PC after the command is accepted without error)

Unit ID

This is a code that specifies the unit. The binary code is fixed at “8901”.

Command and data

Operating command and data (binary code)

Command	Type	Description
0000	Connection check	Check whether communication is enabled between this unit and the PC during standby.
5057	Power supply	During standby 31: Turns on the power When power is on 30: Turns off the power (Standby mode)
4950	Input	When power is on 38: DP 1 39: DP 2 41: DP 3 42: DP 4
5243	Remote control	Sends the same code as the supplied remote control. <ul style="list-style-type: none"> • “Remote Control Code”P. 67

Reference command and data (binary code)

Command	Type	Description
5057	Power supply	During standby or when power is on 30: Standby mode 31: When power is on 32: In the Cool-down mode 34: When error occurs on this unit
4950	Input	When power is on 38: DP 1 39: DP 2 41: DP 3 42: DP 4

End

This code indicates the end of communication. The binary code is fixed at “0A”.

Remote Control Code

Binary code is sent during communication.

- The following applies to the case when the remote control code is "A". In the case of "B", add "36" to the beginning of the code.

Remote Control Button Name	Binary Code

Specifications

Product Name		D-ILA Projector
Model Name		DLA-VS47NV, DLA-VS45NV
Display Panel/Size		D-ILA device *1, 2 0.69" 4K D-ILA (4096 x 2160 pixels) x 3
Light Source		Laser diode and IR LED
Screen Size		Approx. 60" to 300" (Aspect ratio of 4096 x 2160)
Brightness		3000 lm (visible light)
Projection Distance		Refer to P. 70.
Input Compatibility Signal		Refer to P. 72.
Display Resolution		8192 x 4320 pixels VS47NV , 4096 x 2160 pixels VS45NV VS45NVHB
Input Terminal	DisplayPort Input	DisplayPort 1.2a, 20-pin (male) x 4
Output Terminal	SYNC OUT	Mini jack, TTL output x 1 *3
Control Terminal	RS-232C Terminal	Single, D-sub 9-pin (male) x 1 *4
	Remote Terminal	Stereo mini jack (remote control) x 1
	LAN Terminal	Single, RJ45 jack, 10BASE-T/100BASE-TX x 1
Service Terminal	SERVICE	Single (USB Type A) x 1 *5
Power Requirements		AC 100 V to 240 V, 50 Hz/60 Hz VS45NV VS47NV AC 120 V to 240 V, 50 Hz/60 Hz VS45NVHB
Power Consumption		750 W (during standby: 1.5 W *6)
Operation Environment		Temperature: 5°C to 35°C; humidity: 20% to 80%; storage temperature: -10°C to 60°C
Installation Height		Below 6,561 ft (2,000 m)
Dimensions (Width x Height x Depth)		500 mm x 235 mm x 741 mm (including feet)
Mass		35 kg
Accessories		Refer to P. 15.

*1 D-ILA is the abbreviation for Direct Drive Image Light Amplifier.

*2 D-ILA devices are manufactured using extremely high-precision technology with a pixel effectiveness of 99.99%. Only 0.01% or less of the pixels are either missing or would remain permanently lit.

*3 During 3D playback, the display resolution is 4096 x 2160 pixels.

*4 For synchronizing with other equipment.

*5 For external control.

*6 Exclusively for firmware update.

*7 The power consumption of this product during networked standby when all wired network ports are connected is 1.5 W.

- Design and specifications are subject to change without prior notice.
- Please note that some of the pictures and illustrations may have been abridged, enlarged or contextualized in order to aid comprehension. Images may differ from the actual product.

Indicator Display on the Main Unit

Meaning of the front panel indicators

The indicator lights up.

The indicator appears blinking.

Operation mode display

Displays using the different colors and solid/blinking light of the indicator on the projector unit.

“STANDBY/ON” lights up (red)

- In standby state

“STANDBY/ON” lights up (green)

- During startup

“STANDBY/ON” blinking (red)

- In the Cool-down mode

“STANDBY/ON” blinking (green)

- When the video image is temporarily hidden (HIDE is on) *

* “LIGHT” indicator does not blinking when “LED Indication” is set to “Off”.

Estimated timing for replacing laser light source and IR light source

The “LIGHT” indicator lights up when the time to replace the laser light source or IR light source is near.

* “LIGHT” indicator does not light up when “LED Indication” is set to “Off”.

“LIGHT” lights up (orange)

- Lights up when the “LD Current” gauge reaches 95 and above. (When the “Auto Intensity” function is “On”.)

Warning display

You can tell the details of a warning from the (repeated) displays of the “WARNING” and “LIGHT” indicators. The “STANDBY/ON” indicator will light up or appear blinking according to the operation mode of the projector unit. (Please refer to ““Operation mode display”P. 77”.)

The Warning mode is activated once the message is displayed. Projection is interrupted, and the cooling fan is turned on for about 10 seconds.

The power cannot be turned on again while cooling is in progress. Check the following after cooling is complete.

Indicator Status			Blinking Frequency	Description	Check and Countermeasure
WARNING	LIGHT	STANDBY/ON			
 (Red)	 LIGHT	 STANDBY/ON Mode Display	x2	Cooling fan stopped abnormally	<ul style="list-style-type: none"> • Check that nothing is blocking the air inlets. • Check that the external temperature is normal. Countermeasure: Leave the unit unoperated until it cools down. After that, turn on the power again.
			x3	Internal temperature is abnormally high	
			x4	External temperature is too high	
 (Red)	 (Orange)	 STANDBY/ON Mode Display	x1	DD board occurs error	
			x2	Motor board occurs error	
			x3	CPU board occurs error	
			x4	Power board occurs error	
 (Red)	 (Orange)	 STANDBY/ON Mode Display	x1	LD Driver occurs error	
			x3	Color sensor occurs error	
			x4	When the safety switch is activated	Request for repair at your authorized dealer or a nearby service center.
 WARNING	 LIGHT	 STANDBY/ON (Green)	x3	The remote control code differs between this unit and the remote control	Set the remote control code for this unit and the remote control correctly.(P. 53)

If the Warning mode is activated again, wait for the cooling fan to stop, followed by pulling out the power plug from the outlet.

Request for repair at your authorized dealer or a nearby service center.
